LIVEPAD RIG USER MANUAL (ENGLISH)

1. Installation & Initial Setup

- Install LivePadRig using the provided installer. Choose a preferred location for your audio data folder (Pads & Drums) during installation.
- Open your DAW (Pro Tools, Logic Pro, Cubase, Ableton, etc.) and load LivePadRig on an instrument track.
- Upon first launch, the plugin will be silent. Click the **LOCATE FOLDER** button in the top right corner.
- Navigate to the audio folder you specified during installation and select it. The sounds will load automatically.

2. User Interface Navigation

- **Pad Ambient:** 12 note buttons (C to B) to trigger continuous ambient pad sounds (latching).
- **SFX / Drum Triggers:** 8 buttons and faders to trigger one-shot samples like drums, transitions, or loops.
- **Pad DSP Transition:**
    - **Tone:** Adjusts the Low-Pass Filter to make the pad sound darker or brighter.
    - **HPF (High-Pass Filter):** Cuts low frequencies to prevent clashing with bass instruments.
    - **X-FADE:** Controls the crossfade duration (fade-in/fade-out) when changing chords or presets.
- **Output Mixer:** Balances the Master, Pad, and SFX volumes independently.

3. Preset System & MIDI Learn

- **My Preset:** Saves all fader positions, toggle states, selected Pad, and SFX Kit into a single file. Click **SAVE** to store the scene.
- **MIDI Map:** Saves your physical MIDI controller mappings.
- **How to Map MIDI:**
    1. Click the **MIDI LEARN** button.
    2. Click a UI button (e.g., Pad 'C' or SFX 1).
    3. Press a key on your MIDI keyboard or hit a drum pad.

4. Click **SAVE** under the MIDI Map section to make the configuration permanent.

4. Adding Custom Sounds

- **Custom Pad Ambient:** Go to the pads folder inside your LivePadRig audio directory. Create a new folder (e.g., Cinematic_Strings). Add 12 .wav files named with English note suffixes (e.g., Pad_C.wav, String_Cs.wav).
- **Custom SFX / Drum Kit:** Go to the drums folder. Create a new folder (e.g., Worship_Kit). Add up to 8 .wav files. Add numbers to the filenames to force a specific UI order (e.g., 1_Kick.wav, 2_Snare.wav). Reload the plugin to see your new presets.

BUKU PANDUAN LIVEPAD RIG (INDONESIA)

1. Instalasi & Pengaturan Awal

- Instal LivePadRig menggunakan installer yang tersedia. Pilih lokasi untuk menyimpan folder data audio (Pads & Drums) saat proses instalasi.
- Buka DAW (Pro Tools, Logic Pro, Cubase, Ableton, dll) dan muat LivePadRig pada track instrumen.
- Saat pertama kali dibuka, plugin belum bersuara. Klik tombol **LOCATE FOLDER** di sudut kanan atas.
- Arahkan ke folder audio yang kamu pilih saat instalasi, lalu pilih folder tersebut. Suara akan otomatis termuat.

2. Navigasi Antarmuka (UI)

- **Pad Ambient:** 12 tombol nada (C hingga B) untuk memicu suara pad ambient secara terus-menerus (latching).
- **SFX / Drum Triggers:** 8 tombol dan fader untuk memicu sampel satu ketukan (one-shot) seperti drum atau efek transisi.
- **Pad DSP Transition:**
    - **Tone:** Mengatur Low-Pass Filter untuk membuat suara pad lebih gelap atau terang.
    - **HPF (High-Pass Filter):** Memotong frekuensi rendah agar pad tidak bertabrakan dengan instrumen bass.
    - **X-FADE:** Mengatur durasi crossfade saat pergantian chord atau preset.
- **Output Mixer:** Mengatur keseimbangan volume Master, Pad, dan SFX secara mandiri.

3. Sistem Preset & MIDI Learn

- **My Preset:** Menyimpan seluruh posisi fader, status tombol, pilihan Pad, dan Kit SFX ke dalam satu file. Klik **SAVE** untuk menyimpan.
- **MIDI Map:** Menyimpan pengaturan mapping kontroler MIDI fisik kamu.
- **Cara Mapping MIDI:**
    1. Klik tombol **MIDI LEARN**.
    2. Klik salah satu tombol di layar (misal: Pad 'C' atau SFX 1).
    3. Tekan tuts di keyboard MIDI atau pukul drum pad fisikmu.

4. Klik **SAVE** di bagian MIDI Map agar konfigurasi tersimpan permanen.

4. Menambahkan Custom Sound

- **Custom Pad Ambient:** Masuk ke folder pads di direktori audio LivePadRig. Buat folder baru (misal: Cinematic_Strings). Masukkan 12 file .wav dengan akhiran nama nada bahasa Inggris (misal: Pad_C.wav, String_Cs.wav).
- **Custom SFX / Drum Kit:** Masuk ke folder drums. Buat folder baru (misal: Worship_Kit). Masukkan maksimal 8 file .wav. Tambahkan angka di depan nama file untuk mengurutkan posisi di UI (misal: 1_Kick.wav, 2_Snare.wav). Buka ulang plugin untuk melihat preset baru.
